Kenyan Citizen in Nairobi

Experience

Tajji Limited March 2024 – Current

Software Engineer *Nairobi, Kenya*

- Developed RESTful services and Web APIs using Java, Kotlin, Spring Boot, PostgreSQL, AWS, S3 storage and Redis, deployed on DigitalOcean with Docker and Kubernetes, to handle property transactions, payments across microservices and user authentication and accounts.
- Implemented an authorization server following JWT/OAuth, rate-limiting and audit-logging best practices to keep the platform secure.
- Built frontend apps in TypeScript, JavaScript, HTML, CSS, React.js and Next.js, deployed on Cloudflare, to guide users through onboarding and the property management platform.
- Wrote unit and integration tests in JUnit and Vitest through automated CI/CD, ensuring software quality and reducing bugs.
- Directed end-to-end DevOps with GitHub CI/CD pipelines using container image signing and Microsoft Entra ID integration, enhancing delivery security.
- Set up workstations and virtual machines for the team, installed and configured Windows and Linux for staff, and diagnosed and repaired faulty work computers.

Tajji Limited January 2023 – March 2024

Founding Engineer *Eldoret, Kenya*

- Built the company website using TypeScript, JavaScript, HTML, CSS, Vue.js and SvelteKit, deployed on DigitalOcean with Docker and Kubernetes, to improve online presence.
- Collaborated with the backend team on RESTful APIs in TypeScript and Node.js, enabling smooth communication between backend services and frontend apps.
- Conducted user interviews with domain experts and mapped findings in Miro and FigJam to clarify market structure for product decisions.

Emmerce Ltd March 2022 – August 2022

Frontend Engineer Intern *Nairobi, Kenya*

- Took direction from senior engineers during code reviews, revising implementation based on feedback to align with team coding standards before each release.
- Built e-commerce websites using JavaScript, HTML, CSS, Vue and WordPress, deployed in the cloud on custom servers, to extend clients' online reach and improve the shopping experience.
- Assisted in building internal tools in Python and Node.js, deployed internally to monitor and improve KPI metrics.

Projects

Walenje | *Kotlin Multiplatform, Compose, Clean Architecture, MVVM/MVI* | github.com/victorkambi/Walenje

- Built a Kotlin Multiplatform expense tracker with Compose, Clean Architecture and MVVM/MVI. A daily notification prompts users to log receipts, and weekly analytics summarise spending.

Education

Moi University Status - Graduated

Bachelor of Science in Computer Science *Eldoret, Kenya*

IBM SkillsBuild June 2026 – Current

User Experience Designer Pathway *Remote*

Skills

Languages: Kotlin, Java, TypeScript, JavaScript, SQL, HTML/CSS
Backend: Spring Boot, Node.js, PostgreSQL, Redis, REST APIs, JWT/OAuth
Frontend & Mobile: React, Next.js, Vue.js, SvelteKit, Jetpack Compose, Kotlin Multiplatform
DevOps & Cloud: Docker, Kubernetes, GitHub Actions, AWS, S3 storage, DigitalOcean, Cloudflare, Microsoft Entra ID
Testing: JUnit, Vitest
Design: Figma, Miro, FigJam
